Writing: UX Writing, Product Copy, Microcopy, Content Writing, Technical Documentation, Editing, Analytical Writing, Tone of Voice, System Prompt Design, Conversational Writing.

Technology: Python, Flask, SQL, HTML/CSS, JavaScript, REST APIs, Git, Figma, 1C, Excel.

AI & Data: Google Gemini API, NLP, Emotion Recognition, Multimodal & Generative AI, Prompt Engineering, Claude, Data Analysis, Pandas, NumPy, Machine Learning, Time Series Analysis.

PROFESSIONAL SUMMARY

AI Product Writer & Developer with Honors degree in Computer Science and Information Technology (GPA 4.87/5.0). I design, build, and write for AI products — from system prompts and conversational flows to UX microcopy and technical documentation. Creator of Safe Place, a multimodal emotion-aware AI web app that analyzes text and voice. Published 4 research papers, 1st-place winner of university research competition. Completed a 3-month intensive program in Data Science & Machine Learning — GCI World — University of Tokyo (Matsuo-Iwasawa Lab).

EXPERIENCE & PROJECTS

■ AI PRODUCT WRITER & DEVELOPER — Safe Place MAY 2025 – PRESENT

Built full-stack AI web app: Flask, Google Gemini API, 18 REST endpoints, JWT auth.

- Multimodal emotion recognition: text + voice with paralinguistic features, O(1) fusion algorithm.
- Wrote every UI string, system prompt (CBT, empathetic tone, crisis protocols), 10 self-help techniques, 4 blog articles.
- 2 published papers (oral presentations), 1st place research award, +17% accuracy vs text-only.

Result: functional full-stack prototype; research paper and oral presentation at an international academic seminar (2026).

■ Technical Writer & Developer — Manufacturing Company Feb 2026 – Jun 2026

- Developed a 3D warehouse visualization system integrated with 1C and Excel for inventory management.
- Created technical documentation and user guides for non-technical employees.
- Translated technical workflows into clear, practical instructions.

Result: tool adopted for daily inventory management, replacing paper-based records.

■ Analytical Writer — 2026 Bank Budget Plan Oct 2025 – Dec 2025

- Created full budget plan using optimization methods for income, expenses, and supply chain.
- Turned complex financial data into a clear, readable document for non-specialists.

Result: approved with distinction, presented to invited industry experts.

■ Content Editor — Volyn Youth Library Jan 2025 – Feb 2025

- Edited and rewrote visitor applications and letters before official processing.
- Managed book database and registered new users.

Result: processed dozens of documents with zero errors.

PUBLICATIONS:

1. Interpreted Rule-Based Multimodal Fusion for Emotion Recognition (III Conf., 2026) — Oral presentation
2. Safe Place: Generative AI for Mental Health (XI Seminar, 2026) — Oral presentation
3. Dark Mode & Brutalism in UX (III Conf., 2026)
4. Cyber Hackathons in Education (II Conf., 2025)
